

# Vetenskapliga arbeten

Denna lista är hämtad från Powerwatch, en ideell organisation i Storbritannien som sedan 20 år tillbaka samlar in information om elektromagnetiska fält (EMF) och presenterar den på ett sätt så att vanliga människor kan förstå. Med önskvärd tydlighet visar denna sammanställning att det sedan flera decennier tillbaka finns ett otal vetenskapliga arbeten som funnit biologiska effekter från exponering av strålning.

## Symboler

**P** = en studie som har funnit biologiska effekter från exponering av strålning.

**N** = en studie som inte har funnit biologiska effekter från exponering av strålning.

**–** = en studie som har inneburit viktiga nya insikter eller upptäckter men som varken har kommit fram till ett positivt eller negativt forskningsresultat.
